The Committee are of opinion that the writing and publication of text-books be left as far as possible to private enterprise, subject to the condition that they conform fully to departmental requirements. To this end it was resolved that a statement of books required to be written in several subjects for different grades of schools be prepared and advertised in the Gazette and that applications from duly qualified persons be invited, each application to be accompanied by a synopsis of the book to be written and a specimen chapter thereof. The applications may then be referred to the Chairman of the Sub-Committee concerned.

Then the books required to be written for I the Upper Secondary, II the Upper Secondary Training and III the L. S. T. classes were considered as per enclosed statement.

Dr. S. P. Chinnappa proposed the following:—

In the case of books that have been in existence under the patronage of the Department or as a publication of the Department for a period between five and eight years, the Department may throw it open for any authors including the authors of the books themselves either to revise or to rewrite, especially the subject matter and treatment of which have undergone change.

Mr. D. Venkataramaiya brought forward the following proposition in modification of the above:—

The existing books and manuscripts may be classified under three heads:—

A. Those that are suitable in matter and method and may be kept on for some more time.

B. Those that need revision before they are issued afresh.

C. Those that are unsuited and should be replaced by new books.

Accepting this classification, the Committee proceeds to take the following recommendations:—

2. „ B. Puttaiya, B.A.,

Mr. Puttaiya wrote a letter intimating his inability to attend the meeting.

The proceedings of the last meeting were read and confirmed with slight modifications.

The text-books required for use in Middle Schools were taken up for consideration one by one.

The Text-books in English.—The Committee was of opinion that the language of the Englishman was more suitable so far as language went, but the Indian matter was not presented in its proper perspective. Though it was desirable to get books written by an Indian on Indian subjects, yet the Committee felt that the language point of view was so

important that a choice had to be made from among the books written by Englishmen. It was resolved that as far as possible books of desirable Indian content should always be preferred.

Text-books on Translation.—The Committee resolved that as there were no good books available, the publication of a graded series of new books be got written by a competent person or persons.

Kannada Readers.—The Committee was of opinion that there were no suitable readers in Kannada for the first, second and third year classes of the Middle Schools, that a graded series of readers suited to the pupil's standard in content, language and method of presentation should be got newly written, that the two books reported to be under publication (IV and V Readers) may be carefully examined from the view point of getting a graded series and that each reader should contain poetical as well as prose passages.

Grammar in Kannada.—It was resolved that Sabadarsa, Hosagannada Vyakarnam and Vachakabodini, the three departmental publications on Grammar be published with revision so as to take them simpler and to include hints for teachers.

Composition in Kannada.—The Committee unanimously resolved that new books be published on composition with hints for teachers.

Elementary Mathematics.—In view of the resolution passed by the L. E. Board that pupils be taught Elementary Mathematics through the Medium of the vernacular and also examined therein in Kannada, the Committee resolved that a graded series of text-books in Mathematics be brought out in Kannada and Urdu with hints for teachers (*Vide* file on this subject).

Geography.—The Committee resolved that a new book in Geography be made available for the third and fourth year classes of Middle Schools with hints for teachers.

Further, it was resolved that a good Kannada Atlas be published for the use of Middle School classes.

Text-books in Agriculture.—The Committee resolved that text-book in agriculture be revised with suitable hints for the guidance of teachers.

Elementary Science.—It was resolved that a new book on Elementary Science be published with hints for teachers in the light of the Government Order received in August last.

Books of Music.—The Committee resolved that a new book on Music be brought out.

Book on Needle-work.—The Committee resolved that a new book on needle-work be made available with hints for teachers.

Moral and Religious Instruction.—The Committee resolved that a new series of books be published on the lines suggested by the Religious and Moral Instruction Sub-Committee.

The meeting was adjourned to be held on some date between the 20th and the 25th May 1926 to be fixed by the Convenor.
